

ABSTRACT

The invention aims to provide a woven/knitted fabric containing a conductive fiber preferably usable especially for
5 a diagram for a speaker, and a diaphragm for a speaker and a speaker using the woven/knitted fabric.

A woven/knitted fabric comprising a conductive fiber and a non-conductive fiber, wherein the woven/knitted fabric has a woven structure or a knitted structure of said non-conductive
10 fiber and a continuous wiring forming a coil of the conductive fiber.
